

BASIC QUALITATIVE RESEARCH IN HEALTHCARE

COURSE SYNOPSIS

The Palliative Care Centre for Excellence in Research and Education (PaIC) is offering a course in basic qualitative research designed for healthcare professionals who are interested to embark on qualitative research. The programme involves i) 2-weeks of self-directed online study, where participants will be given access to online materials to study at their own pace, and ii) a 0.5-day virtual classroom session. Participants will have the opportunity to learn the basic elements needed to get started on a qualitative research study.

COURSE CONTENT

- ◇ The Elements of Research Process
- ◇ Research Design in Qualitative Research: Formulating a Research Problem, Sampling, Getting Started
- ◇ Brief Overview of the Methodologies
- ◇ Methods for Data Gathering (with hands-on practice)
- ◇ Data Analysis (with hands-on practice)
- ◇ Research Ethics; Positionality of Researcher

WHO SHOULD ATTEND

Healthcare professionals interested in venturing into qualitative research in health professions education, health education and promotion, and health services.

TRAINER

Dr Khoo Hwee Sing
Principal Research Analyst,
Group Clinical Education, NHG
PhD (Management and
Organisation)

Dr Khoo adopts a multi-disciplinary approach in her work, and believes it is essential to bridge research and practice for better sharing, integration, and application of knowledge. This motivates her to view research through different theoretical lenses, and incorporate phenomena into research for educational and practical applications.
